Jaytirth Joshi

CEO & Founder of HealthSathi | Medical AI Innovator | AI/ML SME
| Passionate About Bridging Healthcare & Technology | Actively
Seeking Medical Internships | Driven High School Student at Walton
| Active Model UN Delegate
Marietta, Georgia, United States

Summary

Jaytirth Joshi is a dedicated high school student from Marietta, Georgia, and the CEO and Founder of HealthSathi, an AI-driven platform designed to simplify medical information and improve healthcare accessibility worldwide. With a passion for enhancing healthcare and mental health for everyone, Jaytirth's experiences span hands-on medical internships and active involvement in Model UN, where he advocates for global health policies. Fluent in multiple languages and skilled in healthcare management, Jaytirth combines his leadership in start-up ventures with a commitment to addressing critical health issues, striving to bridge healthcare gaps through innovative technology and advocacy.

Experience

HealthSathi

Chief Executive Officer and Founder
August 2024 - Present (10 months)
Marietta, Georgia, United States

I founded HealthSathi to bridge the healthcare communication gap by providing clear, AI-powered explanations of medical reports. Our AI, Dr. Fatafat, simplifies complex medical data, empowering patients—especially in developing countries—to make informed health decisions with privacy and ease.

Key Contributions:

- Developed and launched an Industry-Shaping AI for healthcare.
- Secured funding to grow HealthSathi.

- Drafted and patented an AI-driven medical diagnostics process.
- Built partnerships to expand accessibility and impact.
- Led a 10+ member team to develop and improve AI-driven healthcare solutions.
- Created an internship program to mentor young innovators in health tech.
- Established a secure patient data repository for long-term health tracking.

Freedom Seal Global

AI/ML SME (Subject Matter Expert)

January 2025 - Present (5 months)

Seattle, Washington, United States

AI and Business consulting

Working with a landscape of ways on how we can implement AI in different systems and social purposes.

Kimaya Heart Institute and Research Centre LLP

Genral Ward, ICU, OT Intern Full-Time

June 2024 - August 2024 (3 months)

Palanpur, Gujarat, India

During my internship at Kimaya Heart Institute and Research Centre LLP, I gained hands-on experience in the cardiovascular unit and ICU, actively participating in open-heart surgeries like Coronary Artery Bypass Grafts (CABGs) and Coronary Angioplasties.

Key Highlights:

- Observed in complex cardiac surgeries and critical care management.
- Engaged in ICU operations, learning emergency interventions and patient monitoring.
- Gained expertise in cardiac anatomy, surgical protocols, and post-op care.

This experience deepened my understanding of open-heart surgery, intensive care, and emergency response in high-pressure medical environments.
